II. Over View of Camu Camu Fruit

2-1. Background of Development

Camu Camu is a tree fruit native to the Amazon rainforest. In Brazil, it is so loved that it is called the Tree of Life. This small fruit is said to have the highest vitamin C content on Earth. In addition, it is in the spotlight as a super food because it has about four times higher antioxidants and anthocyanins than blueberries.

In addition, it is rich in vitamin D, which is likely to be insufficient for Koreans, so it has the advantage of filling all the recommended daily doses with one pill a day. In addition, it contains a large amount of mineral nutrients such as dietary fiber, calcium, iron, magnesium, and zinc.

➡ So, the good ingredients in Camu Camu fruit are made into juice so that it can be absorbed into the body.

II . Overview of Camu Camu Fruit

2-2. Patented technology (summary)

HACCP (HACCP Safety Management Certification)
ISO (Inter- national Organization For Standardization)
Pesticide-free raw material processed food

We produce juice by processing organic CamuCamu Fruit at the workplace where safety management certification standards and ISO certification and eco-friendly certification are recognized by the Ministry of Food and Drug Safety.

II . Overview of Camu Camu Fruit

2-3. Juice Production process (summary)

If you find rotten or bug-eaten fruits in the middle through hand washing and visual inspection, take them out.

After the first hand wash, the fruits are washed by the machine for the second hand wash. Then it automatically moves through the conveyor belt and as soon as it falls, the fruit is crushed and ground

Sterilization is essential in the process of making juice. We are doing pasteurization in the same way as milk sterilization. This is the reason why nutrients are not destroyed and the taste can be the same as drinking directly from the juice with mixer at home

After the pasteurization, the Camu Camu juice is transported to the packaging room through the tube. We purposely installed a transparent pipe so that you can look inside the pipe. It's good to see the color and condition of the juice squeezed on that day with the naked eye, and it's also good to see transparently when cleaning the tube

II . Overview of Camu Camu Fruit

2-4. Usefulness of Camu Camu Fruit

Camu Camu Fruit Benefit

1. It contains about 60 times more vitamin C than lemons, about 70 times more oranges, about 268 times more pineapples, and about 1610 times more vitamin C than apples.
2. I have my own report from Japan, Peru, New Zealand, and Korea as test the material
3. It contains polyphenols and is good for immune change and helps with anti-allergic effects.
4. It contains anthocyanin and has antioxidant and anti-inflammatory and sterilizing effects.
5. It contains a lot of vitamin C, which helps collagen synthesis and hair loss health.

Camu Camu Juice

With the launch of natural organic juice made by Camu Camu Fruit, it is think that consumers will can easily eat it as it contains more vitamin C than other fruit juices.

III . Current situations of domestic & overseas networks

- With the launch of Camu Camu juice, the domestic market in Korea not only operates its own online market .
We have plan to supply food wholesalers, enter the Olive Young and department stores.
- We will strive for smooth export by promoting contact with overseas buyers through food trade consultations and exhibitions through KOTRA and the Seoul Business Agency.
- We have plan to make the food , cosmetics and ice cream by Camu Camu fruits.

Thank you.
